

Horizon Datasheet

95% of breaches begin with targeted phishing

90% success rate when targeted attacks are sent to 10+ users

KEY BENEFITS

GET COMPREHENSIVE PROTECTION AGAINST MULTI-VECTOR PHISHING

STOP PHISHING ATTACKS BEFORE THEY CAUSE HARM

PREVENT COSTLY FINANCIAL LOSSES, DATA BREACHES, AND BRAND DAMAGE

PROTECT KEY EXECUTIVES AND PERSONNEL AGAINST TARGETED CAMPAIGNS

OVERVIEW

Targeted phishing attacks remain the primary cybersecurity threat to organizations large and small. These attacks come from all directions—email, web, and network. Existing defenses struggle with these highly focused and sophisticated campaigns. Users consistently get lured into taking phishing baits, leading to significant financial damage or data loss.

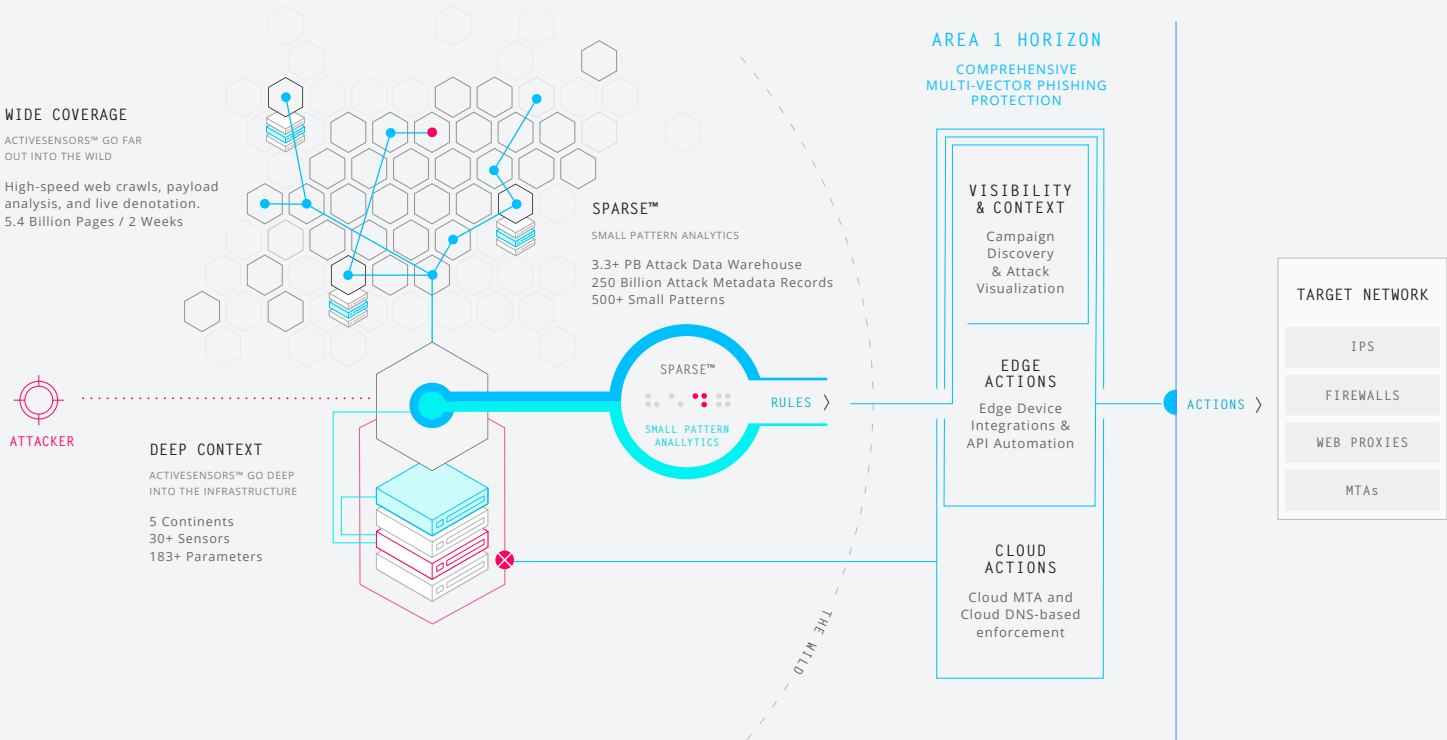

The speed, variety, and maliciousness of these attacks demonstrate the urgent need for a new and advanced platform to address them.

Area 1 Security stops phishing by preemptively identifying and neutralizing campaigns in the earliest stages of an attack.

PRODUCT DESCRIPTION

Offered as a cloud-based service, Area 1 Horizon stops phishing attacks across all traffic vectors—email, web, or network.

Area 1 Horizon goes beyond the perimeter and into the wild. The service provides enterprises advanced visibility and actionable context, while taking decisive, preemptive action on targeted phishing campaigns, stopping them in their earliest stages.

GET AHEAD

AREA 1 HORIZON™ IS THE ONLY SOLUTION ON THE MARKET THAT SHUTS DOWN PHISHING ATTACKS EARLY IN THE KILL CHAIN, WHEN THEY ARE STILL UNDER DEVELOPMENT AND BEFORE THEY CAN CAUSE HARM.

CAPABILITIES

PROACTIVE DISCOVERY AND DECISIVE ACTIONS

With globally distributed sensors, massive scale web-crawling, and comprehensive pre-attack analytics, Area 1 Horizon identifies phishing campaigns, attacker infrastructure, and attack delivery mechanisms during the earliest stages of a phishing attack cycle. The service provides comprehensive protection across all vectors and across all socially engineered campaigns—from watering hole attacks, to ransomware, whaling, spoofing, malvertising, and even BEC scams. Stopping these breaches protects you from theft or compromise of your financial assets, confidential data, and proprietary intellectual property.

AREA 1 HORIZON™

COMPREHENSIVE
PREEMPTIVE
ACCOUNTABLE

Offered as a cloud-based service, Area 1 Horizon provides comprehensive phishing protection for an organization and its end users, independent of location, device, or geography.

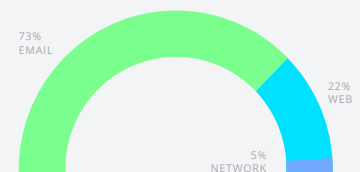

PHISHING VISIBILITY & CONTEXT

GET INSIGHTS INTO GLOBAL AND LOCAL PHISHING CAMPAIGNS

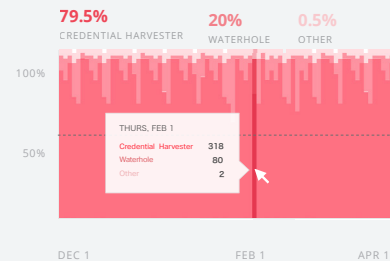

- View targeted campaign activity against your organization and executives
- Discover emergent or active phishing campaigns and advanced cyber attacks
- See global and local phishing campaign activity across industries, entities, and actors
- Understand actor behavior, phishing TTPs, and campaign infrastructure

PHISHING ATTACKS STOPPED

151,366

TOP PHISHING TYPES

ACTIONS AT THE EDGE

STOP PHISHING ATTACKS AT YOUR NETWORK EDGE

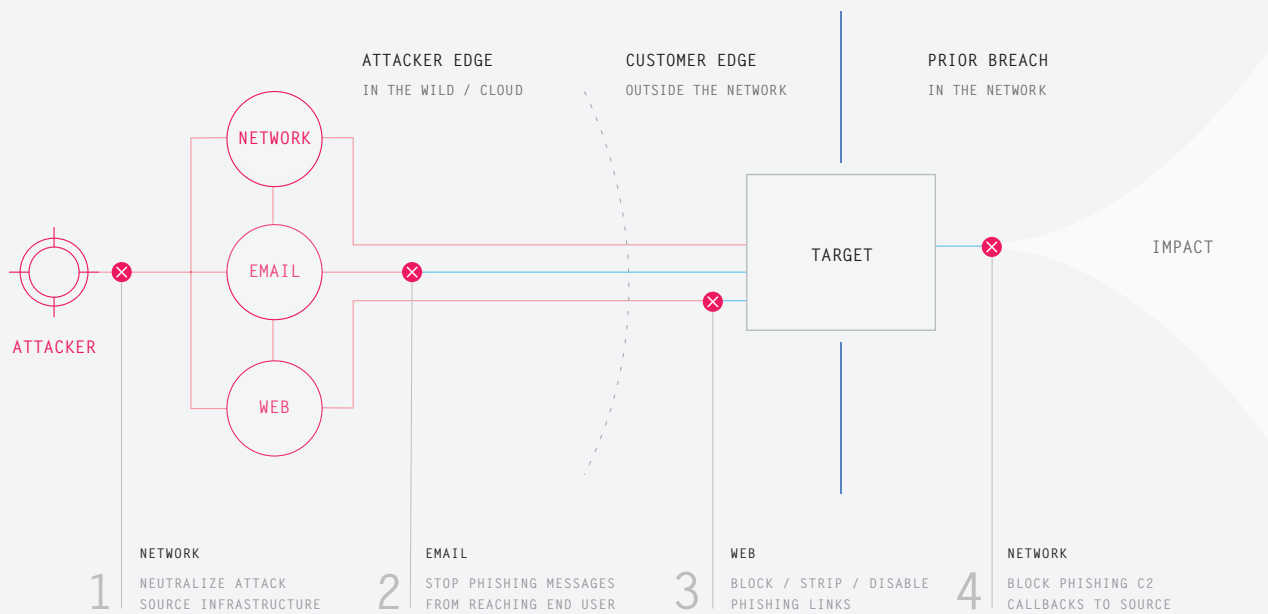

- Stop targeted phishing attacks at your perimeter across a variety of edge devices such as firewalls, secure web gateways, MTAs, and anti-malware gateways
- Enhance current defenses with a flexible range of preemptive actions
- Integrate with your existing workflow and security orchestration platforms through an automated and contextual API

REQUIRING NO INSTALLATION OF HARDWARE, AGENTS, OR APPLIANCES, AREA 1 HORIZON™ IS SIMPLE TO EVALUATE AND DEPLOY IN PRODUCTION.

ACTIONS IN THE CLOUD

PREEMPT PHISHING ATTACKS IN THE CLOUD OR IN THE WILD

- Neutralize phishing threats by taking preemptive action in the cloud or in the wild
- Use cloud-based email protection to detect and stop targeted attacks delivered through malicious phishing messages, ransomware, BEC, whaling, and fraudulent emails
- Protect users against web-based phishing campaigns through a globally distributed recursive DNS service
- Disrupt and deny data exfiltration for active attacks by blocking phishing C2
- Protect mobile and roaming users from advanced targeted campaigns
- Offload or limit auditability requirements by acting on targeted phishing outside your network

ABOUT AREA 1

The industry's most comprehensive anti-phishing solution, Area 1 Horizon identifies threat campaigns, attacker infrastructure, and delivery mechanisms to give an advance warning to stop targeted phishing attacks during the earliest stages of an attack cycle.

Backed by top tier investors, Area 1 Security is led by security and data analytics experts coming from NSA, USCYBERCOM, Cisco/IronPort, and FireEye who realized a pressing need for a proactive solution to targeted phishing attacks. Area 1 Security works with some of the most sophisticated organizations in the world, including F500 banks, insurance companies, and health care providers, to preempt and stop targeted phishing attacks at the outset, improve their cybersecurity posture, and change outcomes.
