

ACCOUNTABLE PHISHING SECURITY

Phishing protection that works—or you don't pay for it

PROBLEM

**1% Volume =
100% Damage**

Phishing attacks typically comprise less than 1% of an organization's traffic yet are responsible for the overwhelming majority of today's soaring data breaches, financial losses, and brand damage. Organizations spend millions of dollars on security technology to defeat attacks, and yet phish still evade existing defenses. Legacy email gateways, focused on catching high-volume spam, miss slower-moving, low-volume phish that sneak past to land in inboxes. Trained employees may spot some phish (at the cost of lost productivity), but when a single missed phish can infect a whole organization, training is not a satisfactory option.

SOLUTION

Area 1 Pay-Per-Phish program

With Area 1 Security's Pay-Per-Phish Program, you can:

- Stop financial and data losses caused by missed phishing attacks
- Pay only for malicious phish detections, with no upfront term commitments or costs
- Augment your current defenses transparently, in minutes, to catch missed phish

[Area 1 Horizon anti-phishing service](#) provides preemptive and comprehensive protection from phishing attacks and is the first and only performance-based security service in the industry. The service is cloud-based and deploys in minutes to detect and block phishing emails, malicious links, and network command-and-control traffic that other security technologies miss. And now with a unique, performance based approach called Pay-Per-Phish, customers can easily add Area 1 Horizon to catch the 1% of attacks that cause 100% of the damage.

Area 1 Pay-Per-Phish

Area 1's Pay-Per-Phish means we detect phish—or you pay nothing: the only accountable anti-phishing protection in the industry. For a nominal cost of \$10 per malicious phish and no upfront term or dollar commitments, customers can get immediate benefit against the most egregious of attacks breaching current defenses.

Compare our committed accountability to competing solutions—that you must pay even when they fail to stop phish—and you'll see why only Area 1 Security offers effective protection that we stand behind. Optimize your security budget today with an accountable anti-phishing service.

We stop phish, or you pay nothing.
